

Auto Ticket Classification using Flow Designer in ServiceNow

SCENARIO

An employee raises an IT service ticket in ServiceNow, which is automatically classified and assigned to the appropriate support group using Flow Designer.

	1. Create Ticket	2. Enter Details	3. Submit Ticket	4. Auto Classification	5. Auto Assignment	6. Support Processing	7. Resolution & Closure
Steps What does the person typically experience?	Open ServiceNow and create ticket	Enter issue description and details	Submit the incident	Flow Designer identifies ticket category	Ticket routed to correct support group	Support team works on issue	Issue resolved and ticket closed
Interactions What interactions do they have at each step along the way?	ServiceNow Web UI	Ticket form	Incident record	Flow Designer	Assignment group	IT Support Team	ServiceNow status/update
Goals & motivations At each step, what is a person’s primary goal or motivation?	“Help me raise my issue easily.”	“Help me explain my problem clearly.”	“Help me submit my request quickly.”	“Classify my ticket automatically.”	“Send my ticket to the right team.”	“Resolve my issue without unnecessary delay.”	“Keep me informed until resolution.”
Positive moments What steps does a typical person find enjoyable, productive, or delightful?	Easy ticket creation	Clear issue details	Ticket created quickly	Automatic classification	Correct team receives ticket	Faster processing	Clear resolution status
Negative moments What steps does a typical person find frustrating, confusing, or time-consuming?		Missing/incomplete details		Ticket may not match a rule	Manual assignment may be needed	Processing delays	Delayed closure
Areas of opportunity How might we make each step better?	Improve ticket form	Add clear field guidance	Validate required information	Add/improve classification rules	Improve assignment rules	Automate more actions	Improve notifications and follow-up
